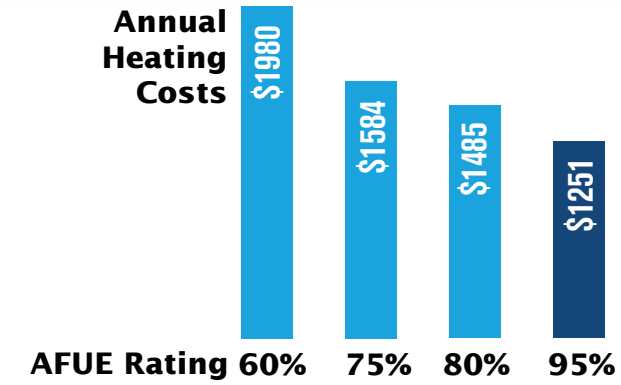
AND WORRY-FREE PERFORMANCE

M120 14 SEER, 95% AFUE GAS/ELECTRIC
PACKAGED SYSTEM PRODUCTS

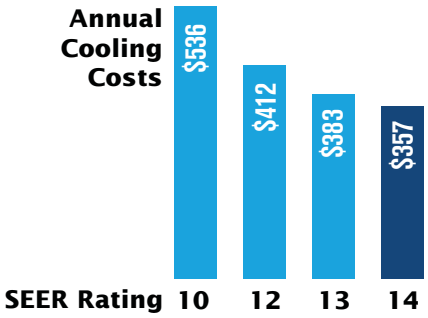
ENERGY SAVING

Maytag® has raised the bar on energy efficiency with the 14 SEER/95% AFUE packaged gas/electric system. Most other packaged systems achieve only 80% AFUE or a little higher. Our Maytag® system reaches an unprecedented efficiency level of 95% AFUE, potentially saving you hundreds of dollars on your gas bill every winter. AFUE measures the amount of heat actually delivered to your house compared to the amount of fuel that you must supply. Thus, a gas/electric packaged system that has an 80% AFUE rating converts 80% of the fuel that you supply to heat – the other 20% is lost out of the chimney. The higher the number, the more efficiently your system operates.

For example, the 95% AFUE rating, which means that the gas/electric packaged unit functions at or above 95% efficiency, is the highest rating available on packaged systems today.



Dollar amounts computed at $.092 cfs/therm, for 3,587 full-load heating hours and a system rated at 60,000 Btuh. Actual costs vary depending on climate conditions, fuel rates, and patterns of usage according to individual lifestyle.



Annual costs based on 36,000 Btu unit, 1,353 cooling load hours and .11/kwh. Actual costs may vary depending on climate conditions, energy rates and patterns of usage.

CHANGE FOR THE BETTER WITH ENERGY STAR

ENERGY STAR®
Certification is awarded to products designed to reduce energy consumption and utility costs. To qualify, packaged systems must have a SEER rating of 14.0 or higher and an EER of 11.0 or higher.

QUIET COMFORT
The high-efficiency fan blades and condenser motor ensure quiet operation and low vibration.

INNOVATION & STYLE
The protective paint finish resists corrosion 50% better than comparable units. The corrosion-resistant drain pan quickly and efficiently drains condensation from the evaporator. The wire guard coated with earth-friendly epoxy and mesh hail guard protect against damage from yard hazards. Indoor and outdoor coils optimize heat transfer and increase durability and reliability.

ecoLogic®

ecoLogic® Seal
Maytag® two-stage, gas/electric packaged products are energy-efficient, environmentally responsible products.

WHAT'S **INSIDE** MATTERS™

12 YEAR LIMITED PARTS WARRANTY

Dependability Promise

These M120 Series of products feature a 12 Year Worry-Free Limited Warranty on parts and a limited lifetime heat exchanger warranty when the product is registered.* Plus, our Dependability Promise states that your entire unit will be replaced if the compressor or heat exchanger fails within the first year of purchase.* Ask your select Maytag® heating and cooling contractor for details or visit us at www.maytaghvac.com.

A gas/electric packaged system combines the convenient electric cooling of an air conditioner with the energy-efficient gas heat of a furnace, all in one space-saving outdoor unit. The two-stage, heating technology works at a higher capacity on colder days or lower capacity on mild days to improve air circulation and minimize indoor temperature variations. All Maytag® packaged systems are quality checked and computer run-tested for performance at the manufacturing facility. Plus all Maytag® gas/electric packaged systems feature a limited lifetime heat exchanger warranty. All packaged systems feature Anteater® or Anteater MC® Micro-Channel evaporator coils for increased resistance to formicary corrosion, the number one cause of coil leaks.

SmartStart® Control Board

Maytag® gas/electric packaged systems feature the SmartStart® Control Board which learns the igniter's heat-up characteristics. It then adapts the ignition time to the packaged unit's characteristics, resulting in extending the life of the igniter.

Depending on your home and climate, a gas/electric packaged system may handle your heating and cooling needs more efficiently than a separate furnace and air conditioner.

*Registration required. Applicable to the original owner.

TOTAL COMFORT

CREATING TOTAL INDOOR COMFORT

A new comfort system can provide more than energy efficiency. Compatible whole-home indoor solutions address specific needs and can improve your indoor living experience. There are solutions for indoor allergens, humidity control and even room temperature control. Be sure to tell your contractor about any specific comfort issues you would like to resolve.

The following system components from Maytag® can improve indoor air quality and help ensure the performance of your packaged unit.

Programmable Thermostats: The thermostat automatically adjusts your indoor temperature to accommodate both your home and away schedules, thereby reducing energy costs.

UV Air Treatment Systems: UV object purifiers and Photo Catalytic Oxidation (PCO) units remove mold, bacteria, and viruses that are found in the air stream and odors from the home.

Humidifiers: Climates with dry air can irritate your skin and trigger allergies, as well as cause furniture and dry wall to crack. A whole-house humidifier helps maintain appropriate moisture levels within your home.

Electronic Air Cleaners: Improve indoor air filtration with an electronic air cleaner that can remove 95% of household allergens, such as dust mites, pollen and smoke.

For more information about these and other Maytag® accessory products, please consult your select Maytag® heating and cooling contractor.
